

OilSafe

Grease Equipment

18" (45,7 cm) Grease Connecting Hose

W.P. 5800PSI

Part# 331021

Fit this flexible hose to GREASE SAFE grease guns and allow easier access to fittings that are hard to reach. Available in two lengths and in a Standard or Heavy Duty style.

Also consider the heavy duty spring guard for extra rigidity to the coupling end of the hose, allowing added safety and convenience in fitment - particularly effective when working with Grease Control Valves.

Standard hose is suitable for hand operated guns, while the Heavy Duty hose may be used on hand operated or air operated grease guns.

Length	Fitting Size	Spring Guard	Working Pressure	Burst Pressure
18"	1/8" NPT	NO	5800 PSI	13775 PSI

Weight: .3 lb / .14 kg
